

FRIENDS OF THE DOUBLING POINT LIGHT

ANNOUNCE THE "GUIDING LIGHT" MATCH CHALLENGE

JULY 2025 WALKWAY PROJECT UPDATE

DONATIONS TO HELP REBUILD THE WALKWAY NOW HAVE TWICE THE IMPACT

Since 1898, the iconic Doubling Point Light has guided Kennebec River mariners and welcomed countless shoreside visitors. Sadly, the distressing September 2023 walkway incident forced immediate closure. Total reconstruction of the access footbridge is necessary to reopen for public benefit. Funding this project is key.

WE'VE MADE HEADWAY

The planning phase of this extensive restoration project is done. All four required government permits and design plans by Calderwood Engineering, have been approved. We've signed a contract with J. B. Leslie Company to begin our important walkway restoration project this September. We have raised the greater part of the revised \$409,500 total project budget!

SECURING THIS MATCH IS ESSENTIAL

Enhanced fundraising is ongoing to obtain the balance of money due to pay all project expenses. Thus, we mailed our annual newsletter earlier this year. Our amazing "Guiding Light" is a very generous private partner who has pledged to match all walkway donations up to \$50,000! If we are successful in satisfying this match challenge, our overall budget target is within reach! ***Please help reopen the historic Doubling Point Light.*** Let your light and kindness shine by sending a generous tax-deductible gift by check, via our website, or by scanning a QR code. Friends of the Doubling Point Light truly appreciate your support!
